

A first for us, painstakingly researched and written by Kat Powell - this book covers the start of Matt's career, how he became a programmer and his meteoric rise in the early days of the UK games industry. We're also excited to be teaming up with our friends and retro book

legends - Fusion Retro Books to help us produce this amazing book. We've worked in print for decades, so we wanted this to be a quality affair. This 200+ page, A5 casebound book has 130gsm inner pages and is beautifully wrapped in a gloss finish cover. We say 200+ pages as Kat is still adding to it as we publish this Kickstarter.

Andres Night Off

Andre's Night Off is a single-player 1984 action platform game for the ZX Spectrum created by Matt. It features room-based platform mechanics tied to the Miner Willy series, originally designed as an unused level for Jet Set Willy. Developed by Matt and published as a type-in program in issue #32 of Computer & Video Games magazine in June 1984. Conceived as a screen/level intended for Jet Set Willy, but it was left out of the final commercial release of the game.

For the first time in computing history, Matt's legendary cult creation "Andrea's Night Off" is finally breaking free from the pages of CVG Magazine and landing onto their rightful home - a physical cassette release!

Enamel Badge Set

We've taken the titles from each game and made them into their own individual badge! The metal and enamel pin badges fit within one inch (25.4mm) squared and are finished in a raised silver effect!

We're known for our quality badges and badge sets - these have become a staple over the last few years - always well received by our backers!

Signed Artwork

Matt has kindly agreed to sign a proportion of the collection, so we've decided to print a limited run of sets of our new redrawn artwork as an A5 collectors art print. There are 25 of each of the three new designs (STYX, Manic Miner and Jet Set Willy) - these have been printed onto 350gsm silk card.

Each art print is individually numbered and comes with a matching numbered certificate of authenticity and full colour envelope to house it. There are VERY limited and would look great as a set on your wall or in your games room!

To honour Matt's legacy and to reward Matt himself for his contribution to the games industry - we humbly bring you this collection, a collection that had taken nearly a year to develop and design - and something we (and Matt) are truly proud of!

THE MATTHEW SMITH COLLECTION
